## UTS PROFILE

The University of Technology, Sydney, is committed to freedom of inquiry, equality of opportunity, the pursuit of excellence in teaching, research and scholarship, and interaction with the professions.

UTS was originally established as the New South Wales Institute of Technology in 1965. In 1988 it attained university status and was joined by the School of Design of the Sydney College of the Arts. The University resulted from amalgamations brought about by the restructuring of the higher education sector in the late 1980s. In January 1990, the Kuring-gai College of Advanced Education, the Institute of Technical and Adult Teacher Education of the Sydney College of Advanced Education and the 'old' UTS formed the new University of Technology, Sydney.

The purpose of the University is outlined in the *University of Technology, Sydney, Act 1989*, and in the constitutions of its controlled entities.

UTS is a multicampus university spread over two locations in the Sydney metropolitan area: City campus incorporates buildings at a number of locations close to the Central railway station; Kuring-gai campus is in a bushland setting on Eton Road, Lindfield, 15 kilometres north of the city.

With a total enrolment of approximately 32,000 students, UTS is one of the largest universities in Australia. UTS places a strong emphasis on workplace experience, incorporating the latest industry practice and professional standards into its curriculum. To achieve this, the University has entered into partnership with a range of industry bodies, corporations and government authorities. As a result, UTS graduates are among the most highly sought after in New South Wales.

## ACADEMIC STRUCTURE

### Faculties

To increase collaboration within and between faculties, from 1 July 2008:

- a new Faculty of Arts and Social Sciences was established in place of the Faculty of Humanities and Social Sciences, Faculty of Education and Institute for International Studies, and
- a new Faculty of Engineering and Information Technology was established in place of the Faculty of Engineering and Faculty of Information Technology.

In 2009, UTS conducts its teaching and research programs principally through the following seven faculties:

- Faculty of Arts and Social Sciences
- Faculty of Business
- Faculty of Design, Architecture and Building
- Faculty of Engineering and Information Technology
- Faculty of Law
- Faculty of Nursing, Midwifery and Health
- Faculty of Science.

Each of the faculties is responsible for course areas across a number of key disciplines, and all faculties offer courses in conjunction with other faculties.

## Course areas

UTS offers undergraduate courses — bachelor's degrees at pass and honours levels — and postgraduate courses — graduate certificates, graduate diplomas, master's by coursework, master's by research and doctoral degrees. Courses at UTS are offered in the following 10 course areas:

- UTS: Business
- UTS: Communication
- UTS: Design, Architecture and Building
- UTS: Education
- UTS: Engineering
- UTS: Information Technology
- UTS: International Studies
- UTS: Law
- UTS: Nursing, Midwifery and Health
- UTS: Science.

Detailed information about the courses offered by the University is published in the UTS: Handbook. The Handbook is available at:

[www.handbook.uts.edu.au](http://www.handbook.uts.edu.au)

## EQUITY AND DIVERSITY

UTS is committed to promoting access, equity, diversity and social justice for both students and staff. It is University policy to provide equal opportunity for all people, regardless of race, colour, descent, national or ethnic origin, ethno-religious background, sex, marital status, pregnancy, potential pregnancy, family responsibilities, disability (physical, intellectual, psychiatric, sensory, neurological, or learning disabilities, and illnesses such as HIV / AIDS), age, homosexuality, transgender status, political conviction, and religious belief.

A range of programs and services helps to ensure that the University's staff and student communities reflect the diversity of the wider community. The University's Equity and Diversity Unit coordinates strategies and programs to support students and staff from diverse backgrounds.

## INTERNATIONAL ACTIVITIES

UTS has a specific goal of creating a university that is internationally connected and internationally focused in its chosen areas of teaching and research strength.

UTS encourages international interactions and attracts strong interest from overseas students, academics and education providers who wish to benefit from its distinctive academic approach. Through all its academic activities, UTS embraces the cultural diversity of its local and overseas students and staff.

Many of UTS's local students undertake some study overseas as part of their degree program. The University's curriculum and ways of teaching and learning equip UTS graduates for international careers and prepare them to live and work in a world of social and cultural diversity.

## RESEARCH AND INNOVATION

UTS has a reputation for high-impact research with a focus on collaborative approaches. The University is nationally and internationally renowned in its areas of concentration and research excellence.

UTS continues to improve overall research performance and standing to complement the high regard of its teaching and learning programs by a continued focus on collaborative research of benefit to society, building researcher capacity, strengthening linkages nationally and internationally, and developing a dynamic research environment.

The University also has a wide range of research centres, many of which are multidisciplinary in nature. These are included in chapter 5.

## SUSTAINABILITY

In 2008, UTS officially launched the environmental sustainability initiative (ESI) and its website:

[www.green.uts.edu.au](http://www.green.uts.edu.au)

In 2008, ESI has established a greenhouse gas emissions inventory, seen UTS invest in 2.55 per cent green power, produced the UTS annual report's first environmental sustainability report and had the Environmental Sustainability Policy 2008–2010 endorsed by Council.

In 2009, the ESI working groups — energy, planning, procurement, reporting and communication, transport, waste, and water — will identify, plan and implement a range of projects aimed at increasing staff and student involvement in ESI and further reducing UTS's environmental impact.

## EMBLEM AND LOGO

The UTS emblem embodies three main components. The most prominent feature is the anchor drawn from the coat of arms of the City of Sydney, where UTS's largest campus is located. It reinforces the University's traditional close links with government, commerce and industry within the city.

The base of the anchor also forms one of the spirals of the double helix in the representation of the DNA molecule, the basic building block of life itself. The symbol, therefore, reflects the innovative, technological character of the University. The wave motif at the base complements the other elements in the design and underlies the maritime position of the City of Sydney.

This contemporary design is contained in a heraldic shield which provides a sense of continuity with tradition for institutions of higher learning through the ages.

The emblem (in teal blue PMS 321) can be used singly or in association with the stylised 'UTS' acronym to form the UTS logo.

## VISION, PURPOSE AND VALUES

### Vision

To be a world-leading university of technology.

### Purpose

To advance knowledge and learning to progress the professions, industry and communities of the world.

UTS shall achieve its purpose by being internationally renowned for:

- practice-oriented and research-integrated learning that develops highly valued graduates
- research which is at the cutting edge of creativity and technology
- a university experience that is intellectually vibrant and socially engaging
- enduring relationships with the professions, industry and communities
- globally relevant academic achievements and outlook.

UTS shall realise its vision and purpose through:

- being a university of first choice for career commencement and development
- graduates who are highly employable and effective in the global workplace
- being a workplace with a progressive approach to attracting staff, developing careers and retaining talent
- being a university community where cultural diversity is valued
- having a coherent academic identity that integrates teaching and research
- internationally recognised research that contributes to economic and social development
- being excellent to do business with
- leadership in internationalising student experiences
- alumni who are strong advocates for, and active contributors to, the University's development
- state of the art facilities, networks and services
- leadership in public debate and a valued corporate citizen
- being a financially, socially and environmentally sustainable university.

### Values

- **discover** and share new knowledge and new ways to lead through our teaching, research, intellectual debate and use of technology
- **engage** and collaborate with each other, our students, alumni partners, professions and communities, locally and internationally
- **empower** each other and our students to grow, contribute, challenge and make a difference
- **deliver** on our obligations to each other, our students, our partners and communities while maintaining high standards and ethical behaviour
- **sustain** our local and global environment, our organisational health and our ability to create a positive, viable future.

## STRATEGIC PLAN

The UTS Strategic Plan 2009–2018 was approved by Council on 10 December 2008. The new plan provides a strong statement about the University's aspirations for its third decade and a clear set of priorities to support its goals.

To build UTS's reputation by 2013, the University will:

- strengthen the standing of the UTS model of practice-oriented learning
- increase the scale, quality and impact of research in our discipline fields
- enhance our strong, inclusive university environment through providing state-of-the-art learning, research and social spaces, infrastructure and services
- build the capabilities of our people and processes to sustain and improve performance into UTS's third decade and beyond.

The initial set of objectives and supporting strategies for the next five years is subject to annual review and is expected to evolve over the life of the plan.

The Vice-Chancellor's Committee and Council monitor performance against the plan regularly, with two formal progress reports provided to Council each year. Senior executive sponsors have been nominated for each objective, strategy and performance indicator.

The new strategic plan will be deployed through the University's planning and improvement framework.
